

Prosper Kessie

FULL STACK DEVELOPER

PROFESSIONAL SUMMARY

Full Stack Developer with experience building web applications end to end. I work with JavaScript, React, Next.js on the frontend and Python and Django on the backend, from writing the first line of code to getting things live. I enjoy figuring out how all the pieces fit together, and I take care to write code that's clean and easy for others to work with. I'm looking for projects where I can contribute meaningfully and keep growing.

EXPERIENCE

Touch Stack Technologies • Remote (Part Time)

Frontend Developer, July 2024 - Present

- Built and shipped the company's official marketing website, directly improving online presence and client acquisition.
- Built and Integrated transactional email and Paystack payment processing into a church giving platform, enabling online donations and reducing manual collection overhead.

Self Employed (Personal Projects) Full-Stack Developer

Full-Stack Developer, Mar 2023 - Present

- **Snappx** - Designed and shipped a full-stack susu (group savings) platform for Ghanaian users. Built contribution tracking, wallet top-ups via Paystack, and savings group management.
- **TicketFlow** - Architected a role-based IT helpdesk system with three distinct user roles (employee, support agent, admin), queue management, and real-time assignment controls.
- **OpenPoll** - Built a real-time polling app supporting four question types (single-choice, multi-choice, ranked-choice, open text) with live result rendering as votes come in.

EDUCATION

MICROVERSE, Mar 2023 - Nov 2023

Remote Full Stack Web Development Program, Full-Time

- Completed 1,400+ hours of training in algorithms, data structures, and full-stack development, building projects with JavaScript, React, Redux, Ruby on Rails, HTML, and CSS.
- Pair programmed remotely with developers from around the world using GitHub, industry-standard Gitflow, and daily standups.
- Earned Full Stack Developer certificate.

CERTIFICATIONS & COURSES

- Python & Django — Udemy, 2024

Collaboration, Strong Problem-Solving, Adaptability, Self-Directed, Time Management.

PROJECTS

[Snappx](#)

- Snappx is a Ghanaian susu savings platform. Lets users join savings groups, top up wallets via Paystack. Built with Next.js, Django, and Typescript.

[OpenPoll](#)

- Build and share polls that show live results as people vote. Supports single-choice, multi-choice, ranked-choice, and open text questions.

[Touchstack](#)

- A marketing website for Touch Stack Technologies. Built with Next.js, Tailwind CSS, Strapi.

[TicketFlow](#)

- A role-based IT helpdesk and ticket management system built for teams. Built with Next and Django.
